

We are thrilled to have discovered Trillium Cabinet Company! We had been working with one of the oldest and best-known local kitchen design firms, but we had become frustrated with very slow response times and company policies that stifled our decision-making process. After only a 30-minute consultation, Trillium owner Steve Campbell delivered a more detailed and much more functional design, in a timely manner and offering exactly what we needed.

We were even more impressed when Trillium's quote came in at much less than that of the other firm. What's more, the cost was not much more than those of the home improvement chains. Unlike the chains, however, Trillium provided customized plans that to fit our family's living style and offered the detail and design elements that provide a high-end finish quality. Our Trillium cabinetry is sure to maximize the return on our investment in our home, not to mention wow our neighbors and guests!

Trillium's quote came in at much less than the other firm's.

Steve and the Trillium team really listened to our goals and ideas for the project and paid attention to how our family uses each part of our home. Then they brought practical ideas as well as creative design touches to the plans in a way that our first design firm only claimed to do and that no home improvement store can possibly offer.

They brought practical ideas as well as creative design touches to the plans

Trillium Cabinet Company coordinated their work seamlessly with our primary remodeling contractor, established a delivery and installation schedule that fit everyone's needs and, most importantly, honored those commitments. Working with Trillium, we always knew what to expect and when. Even though the installation work spanned three rooms (plus a fourth for storage/staging), Trillium excelled with their problem-solving skills, flexibility, and diplomacy, storing and installing over 50 cabinet units without impeding the many other tradesmen involved in the remodel. The project's nature involved many moving targets and last-minute changes, yet Trillium made the necessary changes cheerfully and creatively, with cost adjustments that were both reasonable and clearly communicated.

We always knew what to expect and when.

Installation work was completed efficiently, and with the care and craftsmanship of artisans. Precise adjustments and minute fit-and-finish details are a source of pride to Trillium's installers. We received the same service and workmanship they would put into their own homes' cabinetry. A few months have passed and we still have not found a single issue that was left incomplete or overlooked.

Fit-and-finish details are a source of pride to Trillium's installers.

We are in love with the results of our remodel; and the design, quality and value of our Trillium Cabinetry make it our favorite part!
